OPEN BITCH JUDGE – FAY STOKES

Eleven bitches were entered with 10 being exhibited and what is pleasing to see is the two year old bitches, usually shown in the Intermediate Class coming up into the Open Class having turned 24 months old, which is now a requirement of State Breed Shows.

The class was a class of quality bitches and in awarding the grading of Excellent Merit consideration must be given to superior anatomical construction which should be far above the average.

Whilst some degree of angst existed with some exhibitors who had bitches in this class that may have had a youngster do very well at the show, it still comes down to the progeny having gone through breed survey scheme successfully.

I would like to thank all the handlers on the 'off lead' gaiting it was great to watch and much enjoyed by the spectators.

The Siegerin this year was awarded to – **CH. DURNSTEIN GLITZ N GLAMOUR AZ CL.1** - not only on the anatomical construction of this bitch but on the lines she carries in her pedigree which are proven producing lines in Australia her dam having also been graded Excellent Merit.

My second Excellent Merit award went to – **SUNDANEKA TEQUILA SUNRISE AZ CL.1** – another very well constructed bitch who, although bred in Australia, is a full German bloodline bitch line bred on Yasko Farbenspiel and Ursus Batu – certainly proven producing lines.

LSC Open Dog - Fay Stokes

This is the first year we have been able to award the title of Sieger to the Long Stock Coat Dogs as the number have now increased the this year.

Although there are only two Open LSC Males the quality of both of them is excellent however on this occasion the title of 2016 NSW Sieger is awarded to ***CH.BABANGA MR. ANDERSON AZ** who is also the Silver Medal LSC from this year's National Show.

The dog in second place is also awarded the Excellent Merit - he is of full proven producing German bloodlines and certainly should be of benefit to many of the LSC females in Australia.

I would also like to comment on how beautifully groomed both these males were presented.

Sire not present.

The group consisted of 8 animals from 3 dams however the number exhibited were 1 male and 4 females. They showed very good pigmentation, and proportions, the croups were generally well moulded but slightly short and slightly steep, the forequarter angulations were generally short in upper arm and steep and hindquarters a little deep. The toplines overall were good as were the withers and bone strength. Generally good movement. It is however a little difficult to comment further as the animals presented are all from the one kennel therefore a true reflection of the sire cannot be accurately given.
