2015 NSW State Breed Exhibition.

18 & 19 July 2015

Judge: Mr. V. Tantaro (Vic)

I would like to thank the members and committee of the GSDL for their kind invitation to judge the 2015 State Breed Exhibition (SBE).

It must be noted that my comment, as made, with the fact that the number of animals presented, makes it very difficult to give specific breed direction. What I can report on was that there was an absence of high quality animals and that many animals lack strength of foreface and in particular underjaws should be stronger. The movement of many is marred by incorrect forehand assemblies with short upper arms that should be better angled; good to short under chests and short steep croups that results in restricted movement.

These faults must be seriously considered when breeding into the future: if you chose a similar animal with the same problems you will only entrench the problem in your bloodlines forever. Look out for animals with much type, strong mother lines, long bones and proper GSD proportions.

I would also like to comment on fact that some exhibitors felt it necessary to protest whilst not directly at me by subversive actions and or comment. I can only say to those who feel aggrieved, that my approach to judging this show was to apply a degree of normalisation: yes it would have been so easy to hand out the top awards to all, but in the end what would that have achieved? I do understand your disappointment, but can only offer the fact that when you finally end up with a 'cracker' you will know the difference and then you will question as to why lesser animals are awarded the top grading that can be had in this country and yet are, at a National, placed well down the line and way behind your animal.

In closing I find it incongruous that the membership decided to do away with the MBE but yet the Member Clubs still conduct the SBE even though some of these shows attract less than far, far fewer entries than the MBE ever did, which makes it near impossible to give breed direction.

Thank you to Greg Jones and Fay Stokes and all my ring stewards' for looking after me over the weekend.

I wish you all the very best with your breeding program and know full well the road ahead is not an easy one for all of us.

Vince Tantaro

*** Ch Arkon vom Altenberger-Land (Deu) a ED**

*Sire: *Canyon Vd Lars-AUE 'a' ED (Gmy)*

*Dam: *Calista v Hamyar 'a' ED (Gmy)*

Sire present. ANKC registrations: 158. A dog that has not been used extensively since arriving in Australia and to date has 13 animals through the hip and elbow scheme with a mean score of 6.31 for hips and 54% normal, 7.5% Near normal, 38.5% grade 1 elbows respectively. Even though the sample size is small, concern must be expressed about his elbow results.

This is, I believe, the first time he has presented a group that is sire typical, of good to very good type, size large to very large. Very good type - very good distinction between sexes and ideally underjaws could be stronger, very good pigment –body proportions slightly elongated — normal withers – firm backs – croups slightly short slightly steep – good to very good forechest – angulations good to very good – movement is balanced where the reach could be freer and the hocks and elbows firmer. A pleasing first time group and one I look forward to seeing again. Congratulations.

*** Pepe von der Zenteiche (Deu) a ED**

*Sire: * EU2 de la petite Laticia 'a' ED (Gmy)*

*Dame: * Amy vd Zeneitche "a" (Gmy)*

ANKC registrations: 430. A dog that has been used extensively since not long ago arriving in the country and to date has 18 animals presented to the hip and elbow scheme with a mean score of 7.06 for hips and 96% normal elbows, 4% with UAP. Given the number of registrations, it is surprising that not more of his progeny have been presented to the scheme.

What is surprising is that this is Pepe's home state and one would have expected a far larger entry of his progeny in the show. Comments made at this year's national applies again when viewing the small group as presented. The group demonstrates very good colour and pigment with mixed type. Very good heads. Restrictions are the length and lay of the upper arm and the croup, the movement should be more expansive. Congratulations.

*** Ch. Ustinov vom Romerland (Deu) a ED**

*Sire: *Quantum v Arminius 'a' ED (Gmy)*

*Dam: * Kira v Lacros "a" (Gmy)*

Sire present. ANKC registrations: 207. A dog that has not been used extensively since arriving in Australia and to date 13 animals through the hip and elbow scheme with a mean score of 10.08 for hips and 85% normal, 15% near normal..

We are all familiar with this sire as he is the first SV VA dog to be imported into Australia and who has been used extensively in Europe. Comment as made at this year's National also applies to this group. The type is mixed and is not father typical. Heads could be stronger, withers are normal, restriction of length and lay of upper arm, and short croups, the movement should be more expansive.

*** Xaro von der Plassenberg (Deu) a ED**

*Sire: * Remo v Fichtenschlag 'a' ED (Gmy)*

*Dame: * Wendy Vd piste Trophe "a' (Gmy)*

ANKC registrations: 75. Does not have required sample of 10 for stats to be reportable. The group consists of very young animals and therefore comment is restricted to a general observation: It is noted that the type and movement of the animals in the group is very good. The sire is well bred and I believe offers a high degree of predictability through his sire and dam lines. It will be interesting to see this group grow and develop.

*** CH Sundaneka True Blue A Z**

*Sire: *Fulz di Zenevredo "a" Ed (Gmy)*

*Dam: *Xyna V Niemberger Eck 'a' Ed (Gmy)*

Sire present. ANKC registrations: 8. Does not have required sample of 10 for stats to be reportable. This is the first time that a LSC dog has presented a Progeny Group in Australia and it must be noted that the progeny as presented are all from 1 litter. Therefore any comment must be treated with caution as the animals are also very young. to make definitive comment on. They are father typical large to oversize, with very good colour and pigmentation, good heads where underjaws should be stronger, normal withers, good angulations of the forequarter and very good angulations of the hind quarters. The movement should be more expansive and the withers held higher. A pleasing group however fact they are all siblings together with restrictions should be noted.

Breeders Group.

There were 2 groups competing and this in itself is an achievement as many of us as breeders never have that many animals at a show in order to compete in this class.

1st Jacknell Kennels: Jess Kada.

The group was represented with 3 sires and 4 dams. There was very good uniformity with the animals displaying very good type with good fore and very good angulations and balanced movement. A most pleasing group and it must be noted that the breeder Jess Kada is a younger member of the fraternity and is currently pursuing her ANKC licence to judge GSD'S.

2nd Andacht Kennels: Laurelle Reilly

The group was represented with 5 sires 4 dams: the predictability factor is very high. The group displayed was very good, however with mixed type. Overall the firmness of hocks and elbows should be much firmer. Restrictions of the forequarter and length and lay of the croup, movement should be more expansive. The breeder Laurelle Reilly has enjoyed much success and has a proven record of producing quality animals. Congratulations.
