

# SHEPHERD NEWS

July 2010

Official Publication of the  
German Shepherd Dog League of NSW Inc

**General Meeting 14th July at Erskine Park Club House**

## Committee

<b>President</b>	Graeme Stevenson	02 9450 1639
<b>Vice President</b>	Terry Jarvis	02 9606 5351
<b>Secretary</b>	Fay Stokes	02 4777 4241 0401 019 213 123 Whitegates Road Londonderry 2753
<b>Treasurer</b>	Karen Eaton	02 4375 1292
<b>Show Manager</b>	Tony D'Arcy	02 9670 1971 0418 618 817
<b>Show Secretary</b>	Ann Mackenzie	02 4579 9383
<b>Merchandising</b>	John Nolan	02 46308543 0488039858
<b>Point Score</b>	Greg Jones	02 4753 6073
<b>Training Coordinator</b>	Garry Connolly	0415 942 405
<b>Shepherd News</b>	Craig Babbage	02 9628 7064
<b>Publicity,</b>	Hetty Choy	02 9680 1319
<b>Liaison Officer... For Display Team</b>		
<b>Puppy Listing</b>	Pam Jarvis	02 9606 5351
<b>Membership Registrar</b>	Lee Baker	02 9627 3310
<b>Web Master</b>	Fran McAdam	02 9684 1252
<b>State Tattoo Administrator</b>	Graeme Stevenson	02 9450 1639
<b>Social Secretary</b>	Diane D'Arcy	02 9670 1971
<b>HD Administrator</b>	Jodie Carroll	0412 980 580
<b>Breed Affairs</b>	Fay Stokes	02 4777 4241 0401 019 213

## Life Members

**K Hedberg    P&T Jarvis,    D Gottschalk**  
**D&P Kilner    A Mackenzie,    D Goldstien,**  
**S O'Rourke    L Spalding,    M Davidson**  
**F Stokes    L&C Reilly    D&E Brodie,**

## Welcome New Members

Peter Bloomfield    Karina Davidson  
Stephen, Hellen & Darren Hartney    Marija & Stephen Grech  
Andrew Mills    Sam Musumeci    Maylin Tan  
Roger & Katherine Breen    Matthew Gurney  
Clare Joyce & Brian Callaghan    Peter Mician    Michelle &  
Keith Eldridge    Kevin Ezzy  
Justine & Malcolm    Michael Pestrige / Louise Dempsey  
John MacGowan    Stephen & Julie Barron    John Perez  
Pamela Notley    Graeme & Pauline Costello    Stefano Bianchini  
Kathie Minton    Ffiona & Ian Erskine    Gerad Vinko  
Natasha Glover    Danielle Le Dan    Waldemar Ligenza  
Raymond John Moon    Shai-Leigh McVeigh    Joshua McVeigh  
Frank Greenaway    Danusia Sandercoe    Ian & Robyn Turner  
Katrina Czerkies    Glen ,Wendy ,Luke & Jack Clifton  
Miguel & Tamara Fleitas    Tom Prsa    Shao Mei Deng  
Guanan Huang    Helen Cen    Edmund Cen    Joseph Sourie  
Jeremy ,Geoffrey , Wendy Han    Joanne Villaret  
Ron & Lyn Clark    Abdul Haddad    Sheree Averillo  
Shibab Ally    Roger & Katherine Breen

## Breed Survey

The next Breed Survey will be held at Erskine Park Club Grounds on Sunday 18th July commencing at 11 a.m.

All necessary paperwork can be found on the league's website [www.gsdl.info](http://www.gsdl.info).

At the conclusion of the survey members are welcome to come into the club rooms where a discussion will be held on Preparing and Showing your dog in the Speciality Ring.

I welcome you again to this fine publication and appreciate the time and effort your editor, Craig Babbage, dedicates to its' production.

For those members that may not have realised, there has been a slight change in the official naming of our organisation. We are now known as the 'German Shepherd Dog League of NSW Inc', a change from the 'German Shepherd Dog League Inc'

The national has come and gone for another year. Congratulations are extended to those GSDL members that had success and reward from attending the 2010 National.

The 2011 National is being held in Sydney and there is much hard work ahead of us in organising such a large event. We are looking within our membership base for assistance in the areas of donations, sponsorship and volunteers. Ideally, these many areas could be supported from our general membership who don't show but have a desire to assist and to support the further development and their passion of their beloved breed, the German Shepherd Dog.

If there is any interest in assisting, contact your secretary, Fay Stokes or any member of the management committee.

Accommodation is now posted on the website the schedule will be finalised shortly as it is being held up until we get final confirmation regarding the obedience trial of the National from the RAS. There have been issues with the National Obedience Trial being held in conjunction with the 2011 Royal Easter Show and their obedience section.

Our Open Show/Sanctioned Show in June went ahead with a new format. There were a few little hiccups in the logistics but we can learn from them and move forward to program the December Open Show/Sanctioned Show with the past experience under our belts. In the final wash-up of the show, we gained many benefits from holding the show. These benefits include a closer liaison with Dogs NSW, which can only benefit both organisations. My sincere appreciation must go to your Vice-President, Mr Terry Jarvis for his public relations efforts with Dogs NSW special guests who attended the show. As far as Human Resources management, Terry has proven to be a great asset to the committee's public relations activities.

Dogs NSW are improving our Grounds and hopefully with further negotiation, further improvements on the club House will be forthcoming. This is proof enough of our continuing friendly liaison with Dogs NSW, their CEO, Christine Davis and Committee members of Dogs NSW.

Networking can be a powerful and useful tool in any organisation. Currently we are investigating the access of a portable building/site office. If there are any members that may have contacts in this area and are able to assist the GSDL to acquire such an item, please contact your secretary or me. This acquisition and its' usefulness, I believe will enhance the current facilities we have at our grounds.

Our Campbelltown Branch is moving forward in leaps and bounds with the new Management Committee. It is pleasing to note that the branch is showing a profit after only a few months in office, rather than a loss that has been recorded in the previous two years.

My congratulations and thanks are extended to the committee of the Campbelltown Branch and all the other members that have brought this turn around possible. Also Many thanks to our Training Coordinator, Gary Conolly for the time, effort and guidance he has also put into this branch.

Our welfare side of the GSDL has needed to be re-organised. The association with Save A Shepherd (SAS) has proved very positive and my sincere thanks go to the founders of the organisation, Tanya and Andrew Evans who have decided it is time to take a break due to their personal lives taking a change. The successes are too numerous to mention here. Hetty Choy's articles in this publication are more than sufficient to support the successes that our association has had with SAS and the welfare side of the GSDL. Hetty of course will keep you informed on future developments in this area. Donations received for welfare are being separated from general revenue and will be utilised solely for any welfare costs.

As I reflect on the last two and a half years in office, the GSDL has moved forward in numerous areas. Costs have been minimised, profits have grown along with a growing membership base. Our accounts are in strict order under the guidance and advice of our treasurer, Karen Eaton. It is pleasing to have, and note, that we have a qualified financial professional guiding us in our financial matters. Her support of me in my endeavours to strengthen and stabilise the GSDL, especially financially, is much appreciated.

The website is one of the best in the country with the dedication of our Web-Master, Frances McAdam. During our participation in the Dogs Day Out at the grounds, a Dogs NSW activity, our new publicity material, banner and display boards proved to be a worthwhile acquisition.

There are many areas that have moved forward, both in minor to major ways, due to the dedication of the members of the committee. Many improvements may seem trivial but they all combine to create a strengthening of our foundations and building towards moving forward into the future. All these areas are too numerous to list individually at this time but they all help to form a strong and fluent movement as the GSDL moves forward.

Graeme Stevenson – President, GSDL of NSW Inc.

## **Crazy Sale of Breed survey Books**

**Pre 2007 Survey books for \$5 each**

**or three for \$10.**

**2007-2008 Survey books for \$15 each.**

## NSW STATE BREED ASSESSMENT & MOCK OBEDIENCE TRIALS

**14th & 15th AUGUST, 2010**

GSDL Grounds, Luddenham Road, Erskine Park

### CONFORMATION JUDGES:

#### DOGS

Open Dog	Melanie Groth
Intermediate	Glen Gregory
Junior	Reg Bonello
Puppy	Melanie Groth
Minor	Reg Bonello
Baby	Kim Gregory

#### BITCHES

Open Bitch	Fay Stokes
Intermediate	Kim Gregory
Junior	Fay Stokes
Puppy	Ken Northcote
Minor	Melanie Groth
Baby	Glen Gregory

**MOCK TRIALS OBEDIENCE JUDGE:** Pat Bailey

CCD, Novice, Open, UD, UDX

To be advised

**ENTRY FEES:** All conformation classes \$15.00 1st entry (includes catalogue)  
 \$12.00 subsequent entries  
 Breeders Group - no entry fee but must be sent with entry  
 Mock Trial Entries \$10.00  
 (All cheques/money orders made payable to GSDL)

### **SPECIAL CLASS REQUIREMENTS**

**OPEN DOG & BITCH** Entry must include copy of 5 generation pedigree,  
 & copy of Breed Survey

**SIRES PROGENY** Entry is automatic - minimum of 5 animals presented  
 for assessment, no age restriction, sires must be  
 Breed Surveyed.

**BREEDERS GROUP** minimum of 4 animals presented from a minimum  
 of 2 sires or 2 dams

**SIEGER/SIEGERIN** The title of State Sieger/State Siegerin will be awarded to  
 the highest placed Open Dog & Bitch domiciled and  
 owned in NSW for the previous 12 months (imported  
 dogs are exempt from this time limit) The ACT is  
 considered part of NSW.

**GSDL Point Score will apply**

**JUDGING** commences 9 a.m. Saturday - conformation only  
 Sunday 10.00 a.m. - assembly Breeders Group 9.45 a.m.  
 Obedience and Conformation

**ENTRIES CLOSE** with the Show Secretary, 74 Kolora Road, Ebenezer - 45 799383  
 25th July, 2010 - a self, stamped addressed envelope must accompany  
 for return of receipt.

## ORDER OF JUDGING

### SATURDAY

Baby & Minor Puppy Bitches  
Baby & Minor Puppy Dogs

Sires Progeny

Puppy and Junior Bitches  
Puppy & Junior Dogs

Child Handler competition during luncheon break

### SUNDAY

Mock Trial all obedience sections

Breeders Group

Intermediate Dogs & Bitches  
Open Dogs & Bitches

**THERE WILL BE NO OFF LEAD GAITING OR GUN TESTS AT THIS EVENT**

## AGE ELEGIBILITY FOR CONFORMATION CLASSES

<b>Baby Puppy</b>	3 months & 1 day under 6 months
<b>Minor Puppy</b>	6 months & 1 day under 9 months
<b>Puppy</b>	9 months & 1 day under 12 months
<b>Junior</b>	9 months & 1 day under 18 months
<b>Intermediate</b>	18 months & 1 day under 36 months
<b>Open</b>	24 months & over

**(note: it is not compulsory for animals 2 years old to exhibit in the open class they can remain in intermediate if you wish)**

## PRIZE SCHEDULE

**Conformation** Trophy & sash to 1st and 2nd in all classes  
Trophy for Sieger, Siegerin, Reserve Sieger, Reserve Siegerin  
NSW State Breed Excellent Medal to all animals graded Excellent  
Grading Certificates for all gradings - gradings awarded at discretion of judge.

**Obedience** Trophy & Sash to all class winners CCD, Novice, Open, UD, UDX

**CANTEEN** facilities available both days

**PRESENTATION** in the Club House at the conclusion of the show with light refreshments

# Ig A Immunological Disorders in the GSD

Dr. Karen Hedberg BVSc Jan 2010

## General information

Immunodeficiency disorders are defined by a diminished ability by the body to mount an effective immune response to a perceived threat – eg. infection.

Primary immunodeficiency disease is caused by hereditary defects in the immune system. Secondary immunodeficiency disease is a diminished immune response acquired as a consequence of some other primary disease.

Primary immunodeficiencies involving the cell-mediated, humoral, complement and phagocytic systems have all been described in veterinary literature. Defects involving the humoral immune response are associated with a high susceptibility to bacterial infection. Defects involving the cell-mediated immune response are associated with a high susceptibility to viral, fungal and protozoal infections. Defects in the phagocytic or complement system are associated with disseminated infection.

Clinical Signs – depend on the level at which the immune response is defective and range from chronic respiratory and gastro-intestinal signs and skin infections to life threatening conditions.

**Ig A dysfunction** – a primary Ig A *dysfunction* has been described in the GSD and is probably at the root cause of many GSD specific immunological disorders. Aspergillosis in the GSD has been related directly to the Ig A dysfunction and has an almost 100% death rate.

Other disorders seen in the GSD associated with a compromised immune system (usually involving Ig A) includes the following:-

*Aspergillosis and other mycoses*

*Anal furunculosis* – almost exclusive to the GSD.

*Exocrine pancreatic insufficiency (EPI),*

*Inflammatory bowel disease (IBD),*

*Small intestinal bacterial overgrowth (SIBO)* and its related antibiotic responsive diarrhea (ARD),

*Ocular disease* including Pannus, Plasmoma

*Suppurative otitis externa* (ear infections)

*Skin* -Deep Staph pyoderma/folliculitis,

SLE (Systemic lupus erythematosus and immune mediated skin disease, especially discoid lupus erythematosus (DLE).

Degenerative Myelitis – while not considered to be related to Ig A problems, was initially thought to have an immune-mediated basis. However, there have been few studies of the pathogenesis. The exact precipitating causes of the progressive demyelination and axonal degeneration is still poorly understood.

There has been a DNA test developed to identify those that are “carrying” the problem, however, not all affected dogs develop the condition. Other triggering factors that are yet to be determined are postulated at this stage.

## Current Understanding of Ig A problems in the GSD.

Ig A is primarily involved in mucous surfaces and skin/mucous surface junctions. This means the major areas involved are the skin, gut, eye and nose.

Current understanding of the Ig A problem show this as a very complex problem with no simple answer at this stage.

1. Measurements of Ig A levels show a wide variation of serum Ig A levels in normal GSD'S.
2. Reduced Ig A levels shown in tears and faeces of normal GSD but this can vary between studies.
3. Ig A serum levels do not appear to reflect mucosal Ig A secretion in the GSD, despite normal to increased Ig A plasma cell numbers in the lining of the gut.
4. It appears that GSD's may have a “block” in the **transportation** of Ig A across the intestinal wall into the gut (and possibly other surfaces). Some of the current research involves 2 molecules that transport the Ig A from outside to inside the gut lumen.
5. It has recently been found that dogs can express at least 4 allotypes of Ig A. Interestingly, all GSD's examined so far express just one of these allotypes (type C). This occurs in the Ig A heavy chain hinge region. This could explain or potentially influence the ability of Ig A molecules to bind antigens. (K Allenspach 2009).

It is clear that the GSD is predisposed to a whole slew of immunological or autoimmune diseases, primarily at this stage resulting from a dysfunctional Ig A transport system.

“In the case of bacterial and fungal infectious diseases, it has been proposed that weak immunological defenses at the mucosal or cutaneous surfaces permits the infection to gain foot hold in the body..... The normal regulation of the immune system must be defective to allow an inappropriate attack on self tissues. Most autoimmunity is now considered to have an *infectious trigger*. Both types of disease may be related to an inability of dogs of this breed to deal effectively with infectious agents.

.... The is no simple immunodeficiency in dogs of this breed, and the overall function of the humeral, cell mediated and phagocytic arms of the immune system are generally considered normal. There may however be a defect in the mucosal Ig A production. Serum, tear and salivary Ig A concentrations are usually normal in GSD's, however there is a failure to adequately translocate Ig A across the intestinal epithelial barrier into the gut lumen.

...Current studies are continuing to address the molecular mechanism that underlies this selective defect in mucosal immunity. The laboratory tools are now available to permit further advances in the identification of the gene mutations that may be responsible for defective immunity in this breed.” Michael Day 2003.

## Systemic

**Aspergillosis** – commonly affects the nasal cavity and bone – more often seen in long nosed breeds.

Aspergillosis and other systemic fungal infections are usually as a result of inhalation, more commonly in areas where there is higher humidity. Cases of Aspergillosis have been reported around the world, more so in the warmer and temperature climates.

*Aspergillosis( and other mycoses)*– the disseminated forms ie. where there is spread through out the body, ***the GSD is uniquely susceptible to the severe disseminated forms.*** “The cases seen are often relatively young dogs that develop fungal granulomata throughout the body, particularly involving bone and kidney. ...generally considered to cause opportunistic infection in immunocompromised individuals”. (M.Day 2003)

*Age of onset* – any age but normally younger dogs around the 2-6 years bracket.

*Symptoms* – can vary depending on where the infection sets up. The dog may have vague symptoms of ill health, persistent high temperatures and failure to respond to normal antibiotic therapies.

*Treatment* – getting an accurate diagnosis is the most critical step. X rays on any bone areas that are suspicious, blood tests, culture of urine. The antifungal drugs can be tried but once a GSD's becomes infected, however, ***the odds of the dog surviving are extremely poor*** due to the underlying immunodeficiency of the Ig A system. If the dog's condition does not improve very quickly, it is the kindest thing to consider the dog's welfare above all other issues and do the right thing by the dog.

Numbers seen – Australia wide – less than 5 cases per year.

## Skin

**Deep Staph Pyoderma** (Furunculosis/folliculitis/cellulitis)

*Age of onset* - almost exclusive to middle aged GSD's, usually over 5-6 years of age, probably a slightly higher incidence seen in females.

*Symptoms* - often with a history pattern of intense pruritis prior to breaking out. Areas affected rump, back, flanks and thighs in a bilaterally symmetrical pattern. Some individuals have more extensive lesions affecting the chest and neck. The head, ears and front legs are rarely involved. Most cases have a pattern of frequent relapses and the condition is thought to have an immunological basis. Bacterial hypersensitivity, genetic predisposing factors, immune deficiencies and hypothyroidism have all been considered as precipitating or complicating factors.

*Treatment* - consists of periodic courses of antibiotics, and ongoing use of low doses of cortisone 2-3 x weekly or long courses of cyclosporins. Numbers of these cases are low, but due to the severity of the infections that occasionally build up, these dogs require constant care and ongoing medication. Treated carefully, these dogs can be kept comfortable over 4-6 years, but will not cure, and gradually over time may get more severely affected. Severely affected dogs, if not treated adequately, should be euthanased.

*Numbers affected* – less than 1%

**Dyscoid Lupus Erythematosus** – cutaneous – predisposed breeds include the GSD, Collie, Sheltie, Siberian Husky and Malamute. Immune mediated skin disease.

*Age of onset* - varies but usually the cases seen are over 3-4 years of age.

*Symptoms* – initially depigmentation of nose and lips, this progresses to ulceration, tissue loss and scarring. Ears, eye rims, feet and genitalia may also be affected. Exposure to ultraviolet radiation will exacerbate the condition. In the GSD it is primarily to nasal area that is affected.

*Treatment* - suitable creams (zinc, sun block) and cortisone orally – this is usually ongoing but low level several times a week, more so in summer. This condition is largely controllable. Excessive exposure to summer sun should be avoided. This is an immune system problem. Numbers seen are very small proportionally.

**Nasal Keratitis** – is part of DLE - see above.

## Eye

**Pannus (Chronic Superficial Keratitis)** – affects the cornea of the eye resulting in the increasing deposition of black pigment across the cornea. This is considered to be an autoimmune disorder due to the chronic nature of the inflammatory response.

Pannus occurs in the older GSD; probably affecting less than 5% of the population. Pannus also occurs in quite a few other breeds including the Pug, Pekingese, American Cocker Spaniel to mention but a few. Environmental factors such as altitude and solar radiation may modify the occurrence of this disease.

*Age of onset* – usually older than 6 years of age, most are greater than 8-9 years of age.

*Symptoms* – usually bilateral, symmetrical inflammation of areas of the cornea resulting in patches of variable pigmentation (from pink to black). This reaction often starts at the lateral or lower-lateral edges of the cornea. The pannus (black pigmentation) gradually covers the majority of the cornea and blindness can occur. This condition involves lymphocytic infiltration with expression of inflammatory cytokines and other molecules

*Treatment* – ***this condition is controllable but not curable.*** Long term use of corticosteroid eye drop and/or cyclosporin eye drops can slow the progression of the disease, however the condition can flare up in the hotter months. Treatment is often used daily until there is good control, then ongoing treatment is usually 2-3 x weekly. If the condition flares up, treatment is again stepped up for short periods.

**Plasmoma** – similar condition to pannus, however here it is affecting the conjunctiva and predominantly the 3<sup>rd</sup> eyelids. Not seen very often, affecting GSD's primarily. Incidence within the breed – very low, less than 1%.

*Age of onset* – usually older than 6 years of age.

*Symptoms* – inflammation affecting the conjunctiva and the 3<sup>rd</sup> eye lid. Usually bilateral, can be unilateral. Results in inflamed thickened areas of conjunctiva and the loss of pigmentation and thickening of the 3<sup>rd</sup> eyelid. The affected tissue is invaded with lymphocyte and plasma cells.

*Treatment* – like pannus, this condition is controllable to a large degree, but not curable. Similarly treated to pannus. Long term use of corticosteroid eye drop and/or cyclosporin eye drops can slow the progression of the disease, it can flare up in the hotter months. Treatment is often used daily until there is good control, then ongoing treatment is usually 2-3 x weekly. If the condition flares up, treatment is again stepped up for short periods. The cornea in these cases is unaffected.

This is considered to be an auto-immune disorder due to the chronic nature of the inflammatory response.

## **Gastric Conditions**

GSD's are as a breed prone to a number of chronic gastric conditions. These are a group of conditions/disorders that affect the digestion, absorption of food and/or intestinal stability of the GSD. Many of these conditions probably have an allergic or immunological basis (or trigger). On an overview of these types of conditions as they affect dogs, the GSD is certainly over-represented.

The following conditions have all been proven to have an immune system dysfunction/inflammation process underlying their basis. Equally, treatment of these conditions is generally similar – the aim being to minimize allergic/inflammatory responses of the body and stabilize the gut bacteria and lining so that normal digestion and assimilation of food is possible. The finer points of exactly ***how these allergic or inflammatory responses are triggered*** is the current goal of researchers. Once we know these triggers, we can be far more specific in tuning diets, food types etc such that the incidences of these conditions should diminish significantly over time.

**Idiopathic Inflammatory bowel disease (IBD)** – this is a name covering several different types of diseases, usually classified according to the type of inflammation present and the area of the intestine where the majority of the inflammation occurs. This collective term covers disorders that are associated with persistent or recurrent gastrointestinal signs and are characterized by histological evidence of intestinal inflammation without a specific cause.

As the Ig A system is intricately involved in dampening the body's reaction to gut antigens, any dysfunction in the system will have an immune response reacting to various gut antigens, be it a bacterial product, a food antigen, or a self antigen (autoimmune). The resulting response induces gastrointestinal irritation and inflammation.

Some breeds are more predisposed to more than one type of inflammatory bowel disease – the GSD and the Boxer are certainly of note - and that these diseases are considered to have an immune mediated component.

These chronic conditions are usually seen (on average) in the slightly older dog (antibiotic responsive diarrhea ARD is more commonly seen in younger dogs). "It has been speculated that ARD occurs first, and that prolonged stimulation by the intestinal flora in genetically predisposed individuals, ultimately causes IBD" (K Allenspach 2009).

*Age of onset* - generally not much under 12 months, more commonly seen over 15 months.

*Symptoms* – vomiting (intermittent), diarrhea, weight loss, poor appetite.

*Diagnosis* – care should be taken to ensure that all possible causes of diarrhea and weight loss are thoroughly explored. Test for EPI and bacterial cultures should also be carried out.

***Treatment for these dogs diets aims at stabilizing the gut sufficiently that food can be absorbed, minimizing irritation and stabilizing the gut bacterial populations.***

The food given should ideally be concentrated, of an easily assimilated form so as to be highly digestible with low residue. Certainly, consideration for low allergenic diets should be considered – wheat and beef free diets should be of prime consideration for GSD's as there is a reasonably high percentage of allergies to these components. Despite these diets, some dogs may have to remain on a combination of drugs including metronidazole, motility modifiers, gut bacteria stabilizers, pancreatic enzyme replacers in some conditions, and/or low doses of cortisone in very refractory cases.

**Small intestinal Bacterial Overgrowth (SIBO)** and IBD are often linked, particularly in relation to the GSD. SIBO is thought to occur in the younger animal and if not resolved, turns into IBD over time. [ARD mentioned above is technically the same as SIBO].

*Symptoms* – diarrhea, weight loss, failure to thrive.

*Treatment* - These cases generally respond to antibiotics such as Tetracyclines, Metranidazole or Tylosin. These dogs are often placed on 4-6 weeks of drugs while the gut is stabilized.

\* It is very important that every effort is made to try and sort out the reasons behind the chronic bacterial overgrowth, so the dietary advice given in the IBD section also applies here as well.

**Wheat (Gluten) Allergies** – these are very common in many breeds. Tests run have suggested that over 30% of dogs suspected of having food allergies are sensitive to gluten. Many of the features seen in gluten allergies are also seen in other types of inflammatory bowel diseases eg. Lymphocytic-plasmacytic enteritis, and it highlights the need with this group of diseases to try elimination diets to ensure that what appears as a chronic disease is not a simple allergy driven condition.

*Age of onset* - Many dogs that exhibit this condition often show few signs prior to 7-9 months of age (the earliest I have seen this is around 5 months), as it takes time to sensitise an individual by continual low grade insult.

*Symptoms* usually present as failure to maintain body weight, often despite increasing the food intake; chronically loose to sloppy motions.

*Treatment* As this is around a similar age to the diagnosis of pancreatic insufficiency in GSD's, my first step is to try these dogs on a wheat or gluten free diets for a minimum of 6 weeks and limit the type of meat proteins fed (usually I limit the meat to either chicken or mutton, and cut out beef entirely). If using a dry food, the safest cereal base to use is rice. The other grains that contain some gluten include barley, rye, buckwheat and oats.

I would estimate around 10-15% of GSD's have a definite wheat/gluten sensitivity and this figure can be higher within certain bloodlines. Add in gut bacterial replacers (Protexin, acidophilis etc) and something fine to line the gut (corn flour, slippery elm powder).

**Exocrine Pancreatic Insufficiency (EPI)** – tests TLI – fasted TLI <2.5mg/L is diagnostic. Low serum cobalamin is associated with EPI and distal bowel malabsorption (poor absorption of food). Low serum folate is associated with proximal small bowel malabsorption, small bowel intestinal bacterial overgrowth may raise serum folate and lower serum cobalamin. It has been postulated that this is could be an inherited condition in the GSD and may be inherited as an autosomal recessive trait.

*Age of onset* - from 8 months onwards, most commonly from 2-3 years of age.

*Symptoms* – chronic diarrhoea, often pasty coloured motions, weight loss/failure to hold weight. This is considered an immune mediated condition in the GSD, and as mentioned above, these conditions generally are triggered by an allergic or infectious trigger.

*Treatment* – low fat diets, supplementation with pancreatic enzymes. Some pancreatic enzyme replacers are far better than others \*Creon 1000 is currently the best available. These enzymes are most effectively used by placing them into soaked food about 1 hour before feeding to give the enzymes time to start working.

Place these dogs on low allergy diets in addition to pancreatic enzyme supplementation and bacterial gut replacers, and products to line the gut (see above).

If the dog picks up really well over 4-6 weeks (good weight and firm motions), try gradually removing the pancreatic enzyme supplements, if the weight stays good and the motions stay firm, the majority of the problem could have been a chronic allergic response. If the loose motions return and or the dog starts losing weight, the dog may have to stay on enzyme supplements for life.

**Pancreatic Atrophy** – basically the same as EPI, as it progresses to Pancreatic Acinar atrophy (ie. the more chronic form). GSD's represent over ½ the cases seen.

*Age of onset* – in most breeds, this is seen over 2-3 years of age. In the GSD however these dogs are seen at a young age, even so, signs do not appear prior to 8-12 months of age, so presumably sufficient enzymes are produced prior to this time. *Causes* are considered abnormal immune mediated response to a bacterial or inflammatory dietary response.

*Treatment* These dogs require ongoing pancreatic enzyme supplementation.

The number of GSD's affected by pancreatic insufficiency or atrophy, once the chronic allergy cases are eliminated would be quite small, certainly less than a tenth of the number with gluten allergies.

**## Ensure that the diagnosis of the chronic bowel condition your GSD is diagnosed as having is correct** as chronic wheat (gluten) allergy can present a similar picture of poor absorption of food and/or irritable bowel symptoms. Remove wheat/gluten sources from the diet and see if symptoms abate, try a rice based diet, remove beef proteins as well as this is the most common meat based protein that dogs can be allergic to.

**Chronic Colitis (Lymphocytic-Plasmacytic)** – inflammatory bowel disease, a subtype of IBD, characterised by infiltration of lymphocytes and/or plasma cells into the walls of the intestines, often involving the full thickness of the mucosa. GSD's and Sharpei's may be predisposed.

*Age* – most present before 6 years of age. Signs vary considerably between individuals in type severity and frequency, increasing over time.

*Symptoms* chronic diarrhoea, vomiting common, anorexia followed by bouts of ravenous appetite, chronic weight loss, blood in faeces occasionally seen. Thickened loops of gut, enlarged mesenteric lymph nodes.

*Causes* – infectious (bacterial, salmonella, campylobacter); dietary (food additives, meat or milk proteins, wheat glutens); genetic factors (breed predilections).

*Treat* low allergy diets. Cortisone and long term antibiotics may be needed.

**Eosinophilic Enteritis** – inflammatory disease of the small intestine, an uncommon form or subtype of IBD, which is characterised by the infiltration of eosinophils. This affects parts of the colon where eosinophils have invaded various layers deep. Eosinophils are commonly found where allergic and/or parasitic reactions are going on. The GSD, Rottweiler and Sharpei may be predisposed.

*Age* – younger animals usually less than 5 years of age, but any age can be affected. *Symptoms* – intermittent vomiting, diarrhoea, anorexia, weight loss, thickened bowel loops.

*Causes* – immune related, food allergies, parasites.

*Diagnosis* – involves trying to determine the cause of the ongoing reaction(s). Through worming and dietary elimination trials may be necessary.

*Treatment* with low allergy diets, limited food sources, high digestibility. Long term dietary control may be required. Use of cortisone may be necessary in the short term.

**Anal Furunculosis** – chronic disorder – very debilitating.

*Symptoms* - ulceration, inflammation and sinus tract formation around the anus. Dogs are found licking the area fairly incessantly. Small ulcerations appear which when examined penetrate quite deeply into the tissue behind. Over time these become deeper and more extensive.

This condition is almost exclusive to the GSD (95% of all cases), many affected dogs have concurrent intestinal disease (chronic colitis) or other immune related conditions such as deep staph pyoderma. Chronic diarrhea may contribute by increasing soiling of the anal area.

*Causes* - The major histocompatibility complex (MHC) has been proven to be involved, showing that there is a definite genetic association in affected GSD's. Combined with a broad based and low set tail, there is a reduced aeration of the anal area. With age, there is an increasing inability to raise the tail (due to fusion of the tail vertebrae).

*Treatment* as this condition is considered to be an immune mediated condition, it responds to a variety of immunosuppressive treatments including cortisone, and cyclosporins.

Treatment reduces signs, however the condition has a very high recurrence rate, Surgery has a mixed outcome, although some are cleared. In my experience these complete clearances are few and far between, and are more likely to be successful where tackled early on in the condition.

Good local hygiene with trimming of the hair at the base of the tail and on either side of the rectum (creating a 'breezeway effect') can be very beneficial in assisting in controlling the condition.

*Numbers affected* – probably maximum of 1%

### **Conclusion to Chronic Gastric problems**

The world of immunology and gastroenterology is one that is rapidly changing.

Our understanding of the finer points of what causes these incredible immunological misfirings or over reactions as well as understanding how gastric allergies and infections trigger these unwanted reactions is just beyond our grasp at this time.

Hopefully, over the next 5-10 years as our understanding of the genetics of the underlying molecular processes involved advances, this will have progressed to the stage that we can start to be able to give much better advice and more specific diets that result in minimal disease and a much healthier future for our beloved breed.

## **OFFER TO ALL MEMBERS OF THE GSDL WITH REGISTERED DOGS**

**The League has received the following offer to members should they wish to join -**

### **HYPRO AUSTRALIA PET CARE**

Hypro Pet Care was the major sponsor of the successful 'Dogs on Show' event run on the June long weekend at the Bill Spilstead Complex for Canine Affairs, 44 Luddenham Road, Erskine Park home of Dogs NSW. Hypro launched the new Dogpro Plus range and an on-line breeders ONLY program called "Dogpro Breeders Program". The Dogpro Breeders Programme has been designed to provide what breeders have been asking for a long time. Access to a quality, complete and balanced **dry dog food at reasonable prices.**

Members of Dogpro's Breeders Program not only receive a welcome pack (to the value of \$150\*\*) which includes a personalised Platinum Breeders Card, 1 x Dogpro branded shirt, access to FREE Puppy Kits valued at \$17.00\*\*\* for your new puppy owners and a minimum of 12% discount off Dogpro Plus pet food purchased - up to a maximum of 36%.

In addition, in the monthly Dogs NSW magazine for July, August and September there is a voucher for a further 10% discount that can be redeemed on-line and on top of the 12% discount making a total of 22% off Dogpro Plus range purchased on-line.

Hypro would like to extend the special introductory offer of waiving the \$50 joining fee to current Dogs NSW members of your club. All your members have to do is either fax or post the signed and completed attached membership form to Hypro on 02-4577 0137 or P.O. Box 5758, South Windsor, NSW 2756 by the close of business Friday 23rd July, 2010.

Your club will be remunerated for every registered Dogs NSW member of your club that joins Dogpro Breeders Program as well as for every bag they purchase on-line.

If you or any of your members has any questions around this, don't hesitate to contact Sean at Hypro Pet Care on 0408 626 784 or contact Hypro Pet Care Head Office on 02 4577 0133.

Yours sincerely,

John Camilleri  
General Manager  
Hypro Pet Care

## Congratulations

Rebecca Alverti & Estelle McDonald for their junior handler's placings at the 38th German Shepherd National Show and Trial.

These two GSDL girls won 2nd & 3rd places respectively in the under 12 yrs junior showmanship competition.

These girls did a wonderful job handling their dogs and had great fun in the ring. We look forward to watching their skills develop!

Congratulations to the following League members who gained obedience and championship titles in the last few months.

The following dogs achieved their titles

CCD:

Andacht Idol CCD, Mr G Guthrie

Ch. Durstein Captain Kirk CCD, G Connolly

Jonkahra Cherry Blossom CCD, Miss M Frost

Alncrys Yanna CCD, B McKittrick

Nordenstamm Fee CCD, Mr W White K & A Eaton

Beychief Carousel CCD, Miss N McDonald

(at just 9 1/2 months of age!)

CD:

Skyesfuhre Heeza Digger CD, Mrs G De Vries

CDX:

Jonkahra Makybe Fever CDX, Miss K Minton

The following members achieved their Championship Titles

Ch. Durnstein Captain Kirk CCD, G Connolly

Ch. Karmay Kokoda, J Carrol

Ch. Freevale Signature Deal, M & C Morris

Ch. Sundaneka Madeisha, T Lyons

Garry Connolly

## A Call To All Prospective Obedience Instructors

### OUR DOGS NEED YOU.

All you need to become an instructor is one leg of CD, or at the very minimum their CCD title, so you must have trialed a dog.

A comprehensive course will be conducted, teaching prospective instructors all they will be required to know.

At the end of the course you can expect to be on our current instructor's roster, ready to assist and encourage new and old members on the joys of a well trained, well behaved GSD.

Any interested persons are asked to contact

Training Co-coordinator Garry Connolly directly on,

Ph: 0415942405 or; [hauberkgsd@gmail.com](mailto:hauberkgsd@gmail.com)

## *In loving memory of Leisl* *(Joanchell Elizza)*

*14 November 2000 - 26 May 2010*

*Danni lost her loving big sister.  
I lost my soul mate and best friend.  
Leisl you will forever be my life saver.*

*Rest in peace my baby - I will always love you.*

*Rest in peace my baby - You will never be forgotten*

## 'Leisl'

### An Excellent Ambassador

On Wednesday 26<sup>th</sup> May 2010 the German Shepherd world lost an excellent ambassador with the untimely passing of Joanchell Elizza, 'Leisl'.

Leisl was a daughter of Tacko von der Felsen-Grotte and Xenia von der Natternburg, bred by Anna Mitchell in WA.

Leisl went to live with Sandra Cartwright at 16 months of age, settling in immediately with Patchy the Jack Russell and Benny the cat.

Leisl was a 'social butterfly' and so her life as an ambassador began. She regularly visited a park in Balmain where she happily played with any dog and greeted any person. She attended a short training course where it was noticed that she was excellent with other dogs, especially nervous ones.

Later Sandra and Leisl joined Penrith K&O Club where Leisl's friendly and calm nature were once again noticed. She was quickly invited by two Instructors who also belonged to Springwood & Dist. DTC, to join Springwood and go on their Obedience Demonstration Team. As part of this team Leisl performed at Pet & Animal Expos at Rosehill and Penrith, Dogs By The Bay, and numerous other venues.

During this time Leisl won over many people, both at demos and training, who did not like, or were frightened of GSDs.

At Penrith K&O Club Leisl was the first dog we looked for when we had a new dog join that was fearful or fear aggressive of other dogs. Her aura was such that other dogs just calmed around her, and she seemed to know exactly how to behave around them to win them over. This included small dogs that had been chased by or attacked by large dogs.

Handlers with dogs that were nervous in group stays (especially if trialling), would seek Leisl out to put next to their dog to steady it.

Many in the GSDL would not know Leisl, but those who attended Tuesday nights at Erskine Park will not only know her, but have seen her in action.

Leisl, you are sadly missed by your Mum, Nanna, sister Danni & Benny the cat, and also by Yvonne (The Godmother), Will, Taz, Lexie and Karl.

REST IN PEACE

A boy went to his grandfather's house for a week.

On the first night at dinner he found a thick, slimy goo on his plate, so he said to his grandfather "Grandpa is this plate clean?"

"As clean as cold water can get them." his grandfather answered. This went on for the rest of the week.

On the last day when the boy was leaving the dog wouldn't let him through.

So he said "Grandpa your dog won't let me through." His grandfather replied "Cold Water go lie down"

# Canine Degenerative Myelopathy

A new Test!

By Jodie Carroll

## Overview

Degenerative myelopathy initially affects the back legs and causes muscle weakness and loss, and lack of co ordination. These cause a staggering effect that may appear to be arthritis. The dog may drag one or both rear paws when it walks. This dragging can cause the nails of one foot to be worn down. The condition may lead to extensive paralysis of the back legs. As the disease progresses, the animal may display symptoms such as incontinence and has considerable difficulties with both balance and walking. If allowed to progress, the animal will show front limb involvement and extensive muscle atrophy. Eventually cranial nerve or respiratory muscle involvement necessitates euthanasia.

## Severity

Degenerative Myelopathy has an extreme degree of severity.

## Symptoms

Progression of the disease is generally slow but highly variable. The animal could be crippled within a few months, or may survive up to three years.

Weakness in the hind end

Toe nail wear in the hind feet

Slow reflexes in the hind feet and legs

Trouble getting up

Loss of coordination in the hind legs

Loss of muscle mass in the hind end

## Genetic Testing

Animal Network – Australia Disease and Trait Testing now offers a test for Degenerative Myelopathy which is a simple and non invasive test in the form of a simple mouth swab and this can confirm if the dog is a CARRIER, AFFECTED or CLEAR of the disease.

Obviously if breeders have knowledge of their breeding partners DM status they can avoid mating two “Affected” dogs together and thus minimise the incidence of the disease. DM is now being widely screened for in German and Europe with those dogs status being noted.

Sample kits can be obtained via Animal Network or may be available at your vet or I can supply the kits if required to GSDL members.

Further information can be obtained on

(Free call) 1800 822 999 or

email at [askus@animalnetwork.com.au](mailto:askus@animalnetwork.com.au))

Website is <http://www.animalnetwork.com.au>

Your veterinarian is able to do the collection or an Authorised Collection Officer. I am an Authorised Collection officer so if anyone wishes to obtain a free kit or have their dogs tested they can contact me on 0412 980 580 and I will assist.

Your dogs genetic results are completely secure and only the owner is issued with the results, unless a signed agreement or consent is provided by the owner to use the results.

The recommended cost of each test is \$95.00 however after negotiating with Animal Network they have agreed to offer all German Shepherd Dog League Members a discount of 15% which makes the cost of each test at \$80.00

Once you have obtained a kit make a notation on the form that you are a GSDL member to receive your 15% discount and also note down your dogs tattoo number on the form so that may be recorded.

After 14 days you will receive a Canine Genetic Test Report giving you your dogs test result.

This discount is valid till the end of 2010 for GSDL members.

## From the HD ED Registrar:

"GSDL Members are reminded that they cannot have their HD/ ED application forms processed unless they fill in the section "TATTOO NUMBER" on the form under any circumstances.

If they fail to fill in this section their HD/ ED form will not be processed, it is not up to the HD/ ED registrar to chase up your tattoo number.

Also those members who do not have a tattoo number in their dogs ear are reminded that the form cannot be processed under "ANY" circumstances unless they make application for an AUS number PRIOR to making application for a HD/ ED form.

The AUS application form can be found on the GSDL website.

Members are reminded that these are the RULES under the GSDC of Australia and have not been formulated by the HD/ED Registrar who is merely adhering to those Rules"

# DNA Testing Clinic at the Spring Fair

Erskine Park, NSW

20 - 21 November, 2010

Animal Network Representative  
Helen Ambler will be available at  
the show to perform DNA testing:

- DNA disease & trait testing
- DNA profiling
- Parentage Verification

For bookings contact Helen on  
M: 0431 550 157

E: [helen.ambler@gtglabs.com](mailto:helen.ambler@gtglabs.com)

Animal Genetic & Fertility Network provides services to help  
your dogs have healthier and happier lives.

Unfortunately, Save a Shepherd has been unable to take in any additional dogs since mid May due to a number of issues. Firstly Tanya is about to become a mother with her baby daughter due mid July. Her advanced pregnancy has meant that her activities with shepherd rescue have had to be curtailed.

Secondly the RSPCA have made matters difficult for the group stipulating that rescue dogs must be kept in restrictive concrete pens and not the larger grassy or dirt runs that they currently are housed in.

The RSPCA deemed that as the group were rehoming dogs for a small cost to cover expenses such as desexing, veterinary expenses etc they fell into the same category as pet shops and thus had to meet the same requirements.

The work involved in transporting, housing, feeding, attending to enquiries, processing the mandatory paperwork etc, checking out the pound lists every day was overwhelming. It was quite common to have seventeen dogs in care at any time.

SAS will be regrouping. Tanya is now on maternity leave and is working on setting up a new structure utilizing a committee of volunteers who will be allocated individual tasks.

This will lighten the burden for Tanya and Andrew. SAS still have about 6 rescue dogs in their care looking for homes. We are so grateful for the work that they have done in saving the lives of over 220 German Shepherd Dogs.

In the meantime I have been networking with a number of other rescue groups in order to save as many shepherds as possible.

We have established good working relationships with the Blue Mountains Branch of the RSPCA, who will advise me if any shepherds in need come in, The Animal Rights & Rescue Group who operate in Northern NSW and were instrumental in the rescue of two tattooed girls.

Linda Pierce of the Animal Welfare League whose assistance has been invaluable and Pauline Bellemore who works in conjunction with the AWL & Four Paws Rescue.

Without assistance from Linda and Pauline, the past month would have been very bleak for a number of shepherds. With their help and generosity many lives were saved.

We thank you so much Linda and Pauline, the world is a much better place for having such wonderful, kind and generous people as yourselves..

My heartfelt gratitude also goes to my wonderful helpers.

John Sadler who provides transportation at his own cost collecting dogs from various pounds and taking them to safety to Yass to meet up with SAS, to the Hunter Valley to Pauline who fosters a number of shepherds at her home, to the Box Hill Kennels for boarding and the Box Hill Vet for health checks.

John also fosters dogs at his home. Thank you so much John and also to your understanding wife who has become a "rescue widow".

Jo Tucker, for her generous donations to welfare, in particular for the purchase of a weldmesh run which enabled John to take in a couple of dogs in need until permanent homes could be found.

Jo is my pound buddy and has been so giving of her time in assisting with transport and checking dogs out at pounds etc. Jo fostered a tattooed girl that was scheduled for euthanasia at Blacktown Pound. This girl had an ear infection that could not have been treated in a kennel situation.

This delightful girl now called Amity has now found a loving home where she is an in-house dog. And sleeps on the bed of the family's daughter.

A matter of great concern is that many German Shepherd Dogs are being euthanased by the RSPCA and Blacktown Pound as the dogs are not deemed to fit their rehoming criteria.

I am not au fait with their testing procedures but have been advised by a number of rescue groups that their testing methods leave much to be desired.

Furthermore these tests are conducted in an environment that is very stressful for any dog.

The conditions in pounds are abhorrent and the dogs are kept in small concrete pens for periods up to and exceeding 2 weeks.

The pens are cold and wet and beds are often not put down by staff meaning that the only option that dogs have is to lie down on wet concrete.

I have personally been involved with the rescue and rehoming of two females that were to be euthanased for being unsuitable for rehoming due to dog aggression.

One young female was surrendered at the Blue Mountains Branch of the RSPCA and I received a call from staff advising that she did not fit their criteria and were we able to assist as she was a lovely dog with people.

SAS agreed to take her and she was sent to the Yagoona Branch for desexing where she was collected by John and taken to Yass.

Sascha was rehomed the day after she got to SAS by a couple who had travelled from Victoria and brought their dog with them to meet Sascha.

Sascha is living happily with her new best buddy. Sascha had also displayed no sign of dog aggression at SAS.

Amity as she is now known was collected from Box Hill Kennels by Jo and myself after AWL rescued her from Blacktown Pound. We took her to the vet for heartworm testing, vaccination and to have her ears examined as they were in poor shape and there she mingled quite happily with other dogs. Jo took her home where she spent over a week playing with her two dogs, as well as spending time at the local off leash park

Another girl that was doomed as she did not fit the criteria!

I must mention the efforts off the superb volunteers at both Blacktown and Hawkesbury Pounds who work untiringly to make conditions at the pounds a little more bearable for dogs.

They walk the dogs, wash and groom. Them in fact Amity owes her life to the kindness of a volunteer. The volunteer videoed her playing with another dog, after she was advised of Amity's pending euthanasia. The video was then shown on dogzonline where it came to the attention of AWL and myself. Yet this dog was noted as being dog aggressive by the welfare officer at the pound.

We would like to clarify that we don't expect breeders to take back dogs from pounds etc as there are possible health risks to their dogs especially those breeders that have puppies and we understand that most breeders don't have the facilities to take dogs back. However if a breeder is able to assist with a contribution to the cost of transporting to safety, dogs that they have bred, it would be appreciated.

The cost of petrol etc is paid for by our small group of volunteers, who do this work for the love of the dogs.

Further if a breeder receives a call from someone who has purchased a dog from them but no longer wants the dog, then please advertise the dog on dogzonline in the mature dog section. Currently we are only able to help those dogs that are in urgent need.

Sadly the number of dogs on death row is never ending with approximately 5-7 dogs per week appearing at just three Sydney pounds, i.e. Renbury Farm, Blacktown & Hawkesbury. This figure does not account for others at the RSPCA or regional pounds.

The league's committee has approved the listing of mature dogs on our website providing that they are desexed.

There is currently a provision for older dogs to be listed for sale with the proviso that they are hip and elbow x-rayed. The rationale is that once a dog is desexed it cannot be used for breeding thus negating the need for x-raying as it cannot affect the status of hips or elbows of future generations. The listing is only available to members of the GSDL for tattooed and micro chipped dogs. A certificate of desexing must be provided with an application.

This listing may prove useful for breeders who receive the kind of call described above.

There is a heartbreaking side to dog breeding, the faces of the desperate unwanted dogs that find themselves in dire straits through no fault of their own and we as caring human beings must not forget these unfortunates.

We owe them that. Our love, care and compassion for our dogs should always play an important and pivotal role in our hobby and passion. The focus should not solely be on breeding puppies and winning at shows.

Thank you to all those who have contributed to our rescue group, it is much appreciated.

There is sadness in what we do but also much joy. The look of happiness, the smile on the face of an abused or neglected dog rehomed in a loving home, can bring tears to our eyes and at the same time such happiness, and satisfaction.

Finally, we would like to share with you some 'happy ending' stories of the dogs that did make it out alive and that are now enjoying a new life in loving homes.

The following dogs were all rescued and rehomed by SAS often with assistance of the league welfare group. There are so many stories out there, these are just a few.

### CLINT

Clint is a young 12 mth old boy that Jo collected from death row at Blacktown Pound and fostered him at home until he went to SAS where he was quickly adopted.

Dear Tanya,  
My Mum and Dad said that I'm now old enough and sort of trained enough to have a little brother or sister.

They said that it would be much better if they were younger than me (about 9-10 months would be perfect), and desexed at a young age.

Dad says it has to be a pure shepherd, or pure enough like me.

They have to be very good with other dogs and people, and if they liked cats that would be helpful – but I'm sure I could teach them.

Mum says that they have to have a sweet personality, just like me, and not be a bully. I get sometimes get a bit bullied by big dogs at the doggy park because I'm a bit of a sook (even though I weigh at least 38 kilos).

If you could keep your eye out for a playmate for me that would be great.

Thanks Cooper.

p.s. I have attached latest photos, if you could pass them on to my first foster mum that would be great. She needs to see how handsome I have become!

(Photo of Clint now Cooper)

Hetty and I were asked to go to Box Hill Kennels by Linda of AWL, to pick up Amity (6 ½ y) to take her to the local vet to have her vaccinated, heartworm tested and her ears cleaned.

As soon as Daniel from Box Hill Kennels bought her out of her cage she was very excited to see us as if to say 'you've come to take me home!' That had not crossed my mind until we got her to Box Hill Vets when the vet told us she would need twice daily treatment for her ears. I didn't feel she would be happy going back to prison and although the owners of Box Hill Kennels are very caring, I did assume they wouldn't have time to care for her as they had so many dogs.

So, Amity came home with me.

We arrived home and I left her in the car with the back open but the cage shut and went inside and got out my two shepherd boys, Eric nearly 10 and Jethro 17mths. There was not one lip curl or growl or hackles up.

I let her out and they all did the usual sniffing and checking out each other's rear ends then Amity decided she better check out the yard and house and of course the cats (that's another story!) All three dogs played, ate together and slept together for a week and not a cross word was exchanged in that time.

Amity also made herself very at home at our off leash park and wormed her way into the hearts of all who met her, dogs and humans.

The reason I was very careful when introducing her to my dogs was she was deemed to be dog aggressive at Blacktown and was scheduled to be euthanased. She was rescued from Blacktown pound with hours to spare and she now has a forever home with a lovely family up at Gosford.

She is allowed to sleep on the daughter's bed, she has the run of the house and yard and she has a fur friend next door to talk to. I took her up to meet the family and they had made up their minds to take her regardless. They had not met her or seen photos but took our word that she was a lovely girl.

They went out and bought her toys, new lead, food bowl and food and treats. So we left her there!

Because I had grown so attached to her, I had prepared myself to shed a tear when it came to say goodbye. She had settled herself on the daughter's bed and had started to go to sleep.

I went in and gave her a kiss and said goodbye Calamity and she did not lift her head from the pillow as if to say I am good now, I am here to protect Kristie and you can go home.

At this point I must state that Krisitie is profoundly deaf. She has had a cochlear implant fitted but it has not been turned on yet.

She also works a few days a week and on this day she hadn't yet come home. Needless to say according to the family friend who bought Amity as a gift for Kristie, she could not believe her eyes when she came home to find Amity on her bed.

The pair are now inseparable.

## XENA

Formerly known as Ziva, a 12 mth old pedigreed tattooed female

A note from Xena's new mum

Hi Andrew & Tanya, Hope everything is great & you are finding homes for your lovelies. I have attached a photo of my beautiful Xena. I will send you more when I transfer them off my phone & camera.

She is very well, been to the vet for her vaccinations and is going to training school this Saturday. She is very high spirited and I enjoy having her with me.

We move to Mangrove Mountain in 3 weeks where she will have a huge yard to exert her energy. Stay well & thank you Katie & Xena"

(Photo of Xena)

## BEAR

7 yr old , pedigree, tattooed male

Hi Tanya & Andrew, We had a great weekend at the coast. Bear travels well. He did manage to get his feet wet but the waves were very scary! I got him weighed last week , he is 39 Kilos. Attached are some photos at the beach

Jocelyn

(Photo of Bear)

## CEVA ,

12 mth old female

(Photo of Ceva now Rahni)

Her mum Brigitte says “ The dog that wanted to eat this cat and is becoming her friend”

## BRAXTON

Braxton was a 10 mth old emaciated boy that John Sadler collected from Wyong Pound and fostered at his place before going to SAS.

Hey Andrew and Tanya,  
Just a quick email to let you know how Braxton is going.

He has settled in well and enjoying spending time with us both and also the extended family. He loves his play time with us with his toys and enjoys his daily walks round the neighbourhood as well as local parks and also dog parks.

He is being socialable and socialising with other dogs and enjoys playing with them also. He has also gained some weight and his coat is looking better everyday.

Thank you again for saving him and allowing him to be a part of our family i will attach some photos of him to show you how he looks.

We will be also later on be joining the local German Shepherd Club whom i believe are affiliates of yours, for him to interact with other German Shepherds as well as supporting the breed and looking to make him happier in his new life with new games such as mini fly ball and other activities.

Thank you again  
Lyndon Stacey & Braxton

(Photo of Braxton)

## **ROCKY - A TRAGIC STORY**

In early June, Jo and I were asked by the AWL to assess 3 dogs impounded at Hawkesbury Pound and whilst there to collect a 5 year old male microchipped as Rocky.

Rocky being a microchipped dog had served his mandatory 14 days at the pound and as his owners had not collected him he was scheduled for euthanasia. Linda of the AWL then advised the pound that they would take him into rescue.

Rocky was a magnificent specimen of the breed, a strikingly coloured red and black dog .and we could not believe that such a gorgeous dog with a beautiful nature to match would be abandoned at the pound.

We were even more excited when we saw the remains of a tattoo in his ear .

The tattoo was difficult to read and as Rocky's ears were sore and infected we did not want to cause him any discomfort.

Rocky was to be desexed later that week so it was thought best to give his ears a good clean whilst he was under anaesthetic and then try to read the tattoo.

To our horror we discovered that underneath his beautiful coat, Rocky was just skin and bone.

We delivered Rocky to the Box Hill kennels where he was to be boarded until he had been desexed and had served his quarantine period.

Rocky's condition was so poor that the vet determined to postpone desexing until his condition had improved. Tragically the following day, Rocky was found to be passing a considerable amount of blood and was rushed to the vet for treatment.

The staff did all they could for Rocky but our beautiful boy died the next day.

Rocky did not die alone in the small wet concrete pen at the pound where all he saw for 14 days were 4 high brick walls, to the back, left, right and front. but died in a place that was warm and where at least someone cared.

Unfortunately the tattoo in Rocky's ear was so badly faded that it could not be read. What we can say for certain is that Rocky was not loved , fed or cared for in the last years of his short life. The question is was he ever loved or cared for.

**We would dearly love to know where Rocky came from and something about his past.**

**Can anyone help us? Rocky was born on 23<sup>rd</sup> December, 2004, his microchip no was 985120022443904 and he was found in the Londonderry area.**

**RIP** our beautiful boy , life was not kind to you and you were so deserving of love.

The tragedy was that you were so very close to finding that special person who would have loved you unconditionally.

**VALE** Rocky , the time we spent together was so short but we will never forget you

Hetty & Jo

## Golden Jubilee Edition

**A Condensed History of the German Shepherd Dog in Australia**  
(Due for publication late 2010)

### ORDER FORM for EXTRA COPIES

To celebrate the German Shepherd Dog Council of Australia Inc.'s 50th Birthday, a complete revision and update of the original 1990 Historical Edition is being prepared for publication in October/November 2010.

Approximately 500 pages in size and containing thousands of GSD photographs from all eras, mostly in colour, this publication charts the history of the GSD in Australia from before the formation of the Council in 1960, through the lifting of the infamous 43 year GSD import ban in 1972 for a trial period of one year, then permanently in 1974. This book also contains a series of captivating articles, historic records and other fascinating information to make a truly great read, as well as providing an unsurpassed, invaluable, permanent reference source.

### A must for your GSD Library

On Saturday 12th June our team did three displays at the Dogs NSW event held at the Erskine Park grounds. We were located on the GSDL area on the southern end of the complex behind the club house with the GSDL information stall located on the northern side of the club house.

The location was very convenient because we were close to the facilities, had easy access to parking and plenty of space to walk our dogs and relax. It also afforded the opportunity to share food & fun and talk with members of the Committee and to see what a fantastic job they did in decorating the stall and promoting our German Shepherd breed.

However, because we were located away from the main events areas, the numbers of people who watched the displays were limited but still enthusiastic and thoroughly entertained.

During each display, two children from the audience were invited into the arena to provide markers for the 'Figure of Eight' heeling. One of the young girls overcame her fear of German Shepherds when she volunteered to participate in the last display.

Her mother took many photographs of her standing between Tuesday and Boof during and after the display as testament to her courage and afterwards she spent time patting and feeding them. Lilly was very proud of herself, absolutely comfortable with our dogs and her mother was extremely grateful for this opportunity. And we now have one more little girl who loves German Shepherds!

Fifteen members of the team provided three fabulous displays and lots of fun and laughter for the audience: Axum & Rachel, Boof & Annette, Darius & Julie, Jackson & Elaine, Jaz & Irene, Max & Erin, Tuesday & Tim. Special congratulations to Jackson & Elaine who performed brilliantly during their first demo experience.

Tracey provided excellent commentary during the displays, showing her wealth of experience and knowledge, her sense of fun and wicked sense of humour.

A special thank you to family and friends who supported the team, to our family members and friends who helped with the equipment and throughout the day and to the Committee for their support and assistance.

### Team Update

1. We are looking forward to welcoming at least two new members to our team when we recommence fortnightly practice on 4<sup>th</sup> July.
2. We have no scheduled displays until August.
